More information

RAI Amsterdam has a rich history, what started as an association for the automotive industry in 1893 has grown into an internationally leading trade fair and conference organisation. To this day, we fill a large part of our event calendar with these type of events. From major annual trade fairs and conferences such as Horecava, International Broadcasting Convention, Interclean and various theatre performances, to public events such as Kingsland and Amsterdam Winterparadijs.

Many of these events take place in our exhibition and conference centre in Amsterdam. Here we offer more than 110,000 m² of space, divided over 12 multifunctional halls and various large and small rooms and lounges. We advise and facilitate organisers from A to Z in setting up their event successfully. RAI's own public and trade events also take place at this location, as well as in other parts of the world. On yearly base, we welcome an average of 1.5 million guests at the RAI.

Because we believe in the power of inspiration and education, we provide approximately 80 internships per year. The quality of the internships is high, which entails that our interns do not just make coffee and copy files, but really work independently! Naturally, they are supervised by inspiring, professional internship mentors. We have several positions available in sales, marketing, events but also in F&B, communication and many more. RAI Amsterdam has the ideal internship for you!
